Pain Relief

Recently I had a fall – not too serious – nothing broken – just skinned up areas. Of course when you fall, you catch yourself with your hand(s). The next 2 days I experienced lots of pain in different places – my arm, hand and back. I happened to have the Shaklee Joint/Muscle Pain Relief Cream on hand as we had been using it for my husband's back. Right away I took the Pain Relief Capsules and rubbed the Pain Relief Cream into the areas that were sore. This cream creates a cool feeling and really penetrates into the muscles for immediate relief. At night I also applied heat to these areas. With the help of these 2 products I had amazing results within a couple days. I highly recommend keeping this cream on hand for anytime you over-exert yourself. Carolyn R

Joint & Muscle Pain Cream provides temporary relief in minutes. Deeply penetrating to target arthritis pain, backaches, sore muscle, sports injuries and more. This non-greasy, menthol formula enables fast absorption and provides prolonged release action to affected areas. So effective and convenient to use - keep one for the medicine cabinet, purse, and gym bag.

Pain Cream Item # 31051

Shaklee Life-Strip Live younger, longer

Every serving of Shaklee Life is the culmination of years of research and quality testing to guarantee every Life-Strip delivers pure and potent vitamins, minerals, omega-3 fatty acids, polyphenols, antioxidants, and phytonutrients to help create the foundation for a longer, healthier life.

Joint Pain Gone ... (good for dogs?)

"My life is completely changed with Joint Health Complex. I had double knee replacement in my 20's after playing lots of high impact sports like soccer and hockey. I thought I would have to suffer through it, but now my knees feel so much better! I've had pain getting up every morning, now that is gone. I ran a mile for the first time in over a decade! Joint Health Complex has totally improved my quality of life!"
Mark Wabalas

"I have been a dancer since I was 8 and a competitive gymnast for 8 years. Loved it, but injuries happen and while they may not seem crucial at the time, they can come back to haunt you! I still teach dance and am very active. Two years ago at 51 my knees became excruciatingly painful. Stairs became hard and putting on a smile at my job became more difficult. An MRI confirmed "degeneration" in both of my knees. When Shaklee chose Bob and I to test their new Joint Health Complex, they did not have to ask us twice! My hips had been aching as well and getting out of bed was an exercise in itself. After two days on the product I just got out of bed without evaluation and careful positioning! After five days, I had no twinges in my hips or knees. I am so proud of Shaklee."
Pam

"We have some pretty steep hills in the Tucson mountain area where I live. The hill next to our home is very steep. My knees started complaining after climbing it on my road bike -- not sharp pain but some discomfort. That was a wake up call to me to start taking care of them before things got worse. I got a bottle of the Joint Health Complex. In a few days, the discomfort was gone and my knees felt like they had been oiled from the inside. They used to snap sometimes when I walked, like cracking knuckles. A doctor told me once that it was a lack of synovial fluid. My dad had the same problem, so it was probably genetic. Joint Health Complex also got rid of my snap, crackle and pop after a few days! Our old dogs (a black lab mix and a Vizsla mix) were having problems getting up and down off the patio, so I gave them each one Joint Health Complex. I added this to their dog food once a day. Before I knew it they were moving like young dogs again."
Susan Boettcher, Tucson, Arizona

Feel the Difference
Advanced Joint Health Complex*

GET MOVING

The Shaklee Difference
Clinically supported in a published study, our patented, fast-acting form of boswellia extract was shown to improve joint comfort in as few as five days.

- up to **28%** faster than leading brands
- rated to be **45%** more effective at long-term joint comfort
- up to **31%** more ease of motion

Water & Hydration Issues

The Government's National Institute of Health reports that a lack of sufficient water causes headaches, cramps, irritability, confusion, dizziness, light headedness, listlessness and if serious enough, delirium, shock and unconsciousness. Nutritionists recommend one ounce of water per pound per day. For instance if you weigh 128 pounds you would need 1 gallon of water a day. The thirst reaction is not always a reliable indicator of necessary hydration and other liquids are not an effective substitute.

SHAKLEE "PERFORMANCE" is a great tasting hydration drink that will balance your electrolytes and create greater thirst. Performance hydrates much better than just water alone. It contains important electrolytes, sodium, potassium, chloride, calcium and magnesium. Tests have proven that Shaklee Performance supplies 67% more muscle fuel than Gatorade for increased vitality and endurance. In a Sports Illustrated article, competitive cyclist Frank Scioscia stated,

"This drink blows away other drinks. I've lost up to 8 pounds in cycling competitions after a six hour test, but with Shaklee Performance I didn't lose anything."

"I use Performance and Pomegranate Energizing Tea (combined) every day for good health!" Lorri K.

Healthier

For many years, I dealt with an issue with my heart. By 2008, I was on many serious medications and my new cardiologist wanted me to go off of them! So did we! With my doctor's help and Shaklee products I was able to eventually go off of all the medications and I felt so much better! Thankfully Shaklee supplements were a major part of this program. The following year, my doctor and I discussed the importance of losing weight. Since retiring from the Air Force seven years prior, I had gained six pounds per year! I was in the obese range and I needed to do something! My wife, Dale, and I both decided to get on the Shaklee 180 Plan and we followed it to the letter. I lost 45 pounds and 3 pants sizes and Dale lost 4 pants sizes!

We both learned how to keep the weight off and have now done that for three years. I had a physical recently and got a great report. As a result of losing weight and Shaklee supplements, I am on zero medications! We still utilize and love all the 180 products and supplements. Every day begins with a delicious healthy smoothie! Jim

Happier

After a very successful 34-year stint with the Air Force, I took a position as the HR Director for a state agency. In 2008, I had to lay off over 300 people from the agency! Every year thereafter became more and more stressful and it was taking its toll on my emotional and physical health.

I wanted a way out. In 2013 I became a John Maxwell certified coach, trainer and speaker part-time and loved it! That same year, I began discussing how I could leave my stressful job. I took a serious look at my wife Dale's Shaklee business, and felt confident that this would be a great option. I happily joined my wife and left the agency in January 2014 — two years earlier than I had originally planned to retire.

It has been two years and we have never regretted that decision. Our retirement years are now full of joy, abundance and freedom. We get to do the things we love and use our gifts and skills to help others. We get to choose when and where we work and choose the people with whom we work. It allows us to spend more time with our friends and family and we have the health to enjoy it all! We are blessed!

Jim

Our Get Clean products feature super-concentrated formulas and biodegradable, recyclable, or reduced-waste packaging that eliminate 23 million pounds of packaging waste and 54 million pounds of greenhouse gas emissions. Get Clean products are natural and nontoxic, with no harmful fumes, phosphates, phthalates, or bisphenol-A (BPA).

Dr. Bevacqua's Story: "Six Months to Live!"

In 1995, with a Ph.D. in molecular biology, Dr. Sandra was employed at Alamos Lab which required a physical exam that included extensive blood work. The lab ran her tests twice, then asked her to come back for yet another test. After the third test she was asked to come immediately for a consultation. The physician told her to get her life in order, her blood work indicated that she had one year to live. A big "Wake Up" call! Genetically, she inherited the genes from both sides of her family for cardiovascular illness. She was only 39 years old her cousin had passed away at age 41! She went to a specialist in California for a second opinion. He said she only had six months to live! She told him she liked the first opinion better.

She was given a list of drugs to take, which she had already researched. She was aware of their side effects and their dismal success rate. So now she was out in the ocean of the "unknown". She enlisted the aid of her personal physician who gave her alternative medicine's answers for the day, which included very questionable and obnoxious substances. She tried every health food vitamin and supplement she could find. The vitamins from the health food store did not improve her bloodwork numbers at all. To say that her research was extensive would be an understatement. All of the research at that time was either in Japan or Germany — her phone bill skyrocketed! She tried expensive vitamins, supplements, herbs, fiber sources — you name it, she tried it. She had her blood tested every two to three weeks. She became an expert at reading the numbers of her bloodwork. She read anything and everything she could on the subject, and filled her library with the latest studies on the subject.

Dr. Sandra is a horse woman, and she rented out stalls to people in the area with horses. One of her customers was a young girl with a new horse. Her mother just happened to be a Shaklee Distributor. Their first conversation about Shaklee left Dr. Sandra unimpressed, however, when she heard the words, "Money Back Guarantee," her attitude changed. She woke up one morning with an epiphany — "It won't hurt to try What can I lose?"

This was the beginning of her adventure with Shaklee. Not only did her numbers drop, but within weeks of starting Shaklee products her cholesterol, that had been literally off the charts, was down in the normal range. The expensive vitamins were only able to bring it down minimally. Also her asthma and allergy symptoms ceased. She had battled infertility, but after switching to Shaklee nutrition, she became pregnant with her son. It didn't all happen at once, but the improvement in her bloodwork continued until the numbers were in the normal range. **That was 20 years ago.** She is not only alive and well, but has amazing energy. The weight of her testimony and the research she developed became the ground-work for her consulting practice that has blessed many lives. Her research has not only helped people with heart disease, but it has also helped people with cancer and numerous other debilitating illnesses. When we bring the body into the balance that God meant for optimum health, we are able to not only rid ourselves of illness, but also live productive lives well beyond the years that our genetic predispositions might indicate.

Long years and quality of life are within our grasp!
